Email：hyacolbiotechnology@gmail.com

Guangzhou Hyacol Biotechnology Co., Ltd.

Why choose Hyacol Biotechnology?

Rich manufacturing experience: With years of product production experience, we ensure optimal product performance and competitive pricing..

1,We can offer samples for wholesale price, and if you reorder we can give you a better price.

2, We can offer customize service, special specification is no problem.

3, We can offer better after-sale service.

4, We accept OEM and relabeling.

Product Catalog

Fat-Dissolving Products

1.1 Standard Fat Dissolver
1.2 Red Fat Dissolver
1.3 Body Fat Dissolving
1.4 Yellow Fat Dissolve
1.5 Upgraded version（Hyaluron Pen）
1.6 V-Line Slimming

Deep Guide Subsiding Fillers

3.1 Full Subsidencer
3.2 40% Subsidence
3.3 20% Subsidence

C-Grade Superficial Guide Boosters

5.1 Pentapeptide and Hexapeptide
5.2 Type III Collagen
5.3 Youth Nutrient Solution
5.4 Salmon DNA (PDRN)
5.5 Tranexamic Acid
5.6 Little Brown Bottle
5.7 Blue Hydration Serum

Gels and Facial Masks

7.1 Medical Feminine Intimate Gel (Medical Device)
7.2 Feminine Intimate Hygiene Gel (Sanitizing)
7.3 Crystal Ice Mask
7.4 Age-Defying Peptide Mask

Deep Guide Non-Subsiding Fillers

2.1 Large Molecule
2.2 Medium Molecule
2.3 Pig Collagen (Small Molecule)
2.4 Hitaluronic (Vital))

B-Grade Skin Boosters

4.1 Hyaluronic Acid
4.2 BRIGHTENING SPOT REDUCING SERUM
4.3 Hydro VC Essence
4.4 Pink Booster + Celebrity Face
4.5 PDRN (Salmon DNA) - High & Low
4.6 Type III Collagen Essence + Lyophilized Powder

Superficial Guide Lyophilized Powders

6.1 Acne Removal Lyophilized Powder
6.2 Whitening Master
6.3 Glutathione
6.4 Firming ABCD
6.5 Lifting ABCD
6.6 Oligopeptide Lyophilized Powder
6.7 Repairing Solution

Deep Guide Fat Dissolving & Lifting

1

1.1 Standard Fat Dissolving
Specification: 7ML (6.5)

Application Areas: Face (not effective for masseter muscles) / Chin / Body / Stomach (avoid within a 3-finger radius of the navel) / Thighs / Axillary Breast / Buffalo Hump (add Triamcinolone for softening)

Key Benefits:
• Dissolves & Eliminates Fat: Breaks down fat cells and facilitates their natural removal from the body.
• Lifts & Tightens: Promotes noticeable skin firming and contouring.
• Non-Rebound Results: Ensures long-lasting effects without the fat returning.

Main Ingredients:
• Dissolves & Eliminates Fat: Breaks down fat cells and facilitates their natural Main Ingredients:
• Lecithin: The primary fat-dissolving agent.
• L-Carnitine: Boosts metabolism to convert fat into energy.
• Phosphatidyl (Soy-derived): Maintains skin cell flexibility and resilience.
Cholinesterase & Fibrinolytic Serine Active Enzyme: Work together to enhance muscle tone and vitality.
• Lifts & Tightens: Promotes noticeable skin firming and contouring.
• Non-Rebound Results: Ensures long-lasting effects without the fat returning.

2

1.2 Red Fat Dissolver
Specification: 10ML (9)

Application Areas: Face and full body.

Main Ingredients:
Specially enhanced with Vitamin B12 to achieve its characteristic red hue.

3

1.3 Body Fat Dissolving
Specification: 30ML

Application Areas: Face and full body.

Main Ingredients:
• Dissolves & Eliminates Fat: Breaks down fat cells and facilitates their natural Main Ingredients:
• Lecithin: The primary fat-dissolving agent.
• L-Carnitine: Boosts metabolism to convert fat into energy.
• Phosphatidyl (Soy-derived): Maintains skin cell flexibility and resilience.
Cholinesterase & Fibrinolytic Serine Active Enzyme: Work together to enhance muscle tone and vitality.
• Lifts & Tightens: Promotes noticeable skin firming and contouring.
• Non-Rebound Results: Ensures long-lasting effects without the fat returning.

4

1.4 Yellow Fat Dissolve
Specification: 10ML（9）

Application Areas: Face

Main Ingredients:
Vitamin B6 is added for yellow coloration.

5

1.5 Upgraded version
（Hyaluron Pen）
Specification: 7ML（6.5）

Key Benefits:
Tightens sagging skin for an overall face lift, while smoothing and preventing wrinkles.

Main Ingredients:
•Acetyl Hexapeptide-8: For tightening, lifting, and anti-wrinkle.
•Carnitine Tartrate: For localized fat breakdown, oil regulation, and brightening.

6

1.6 V-Line Slimming
Specification: 6ML+4.5ML

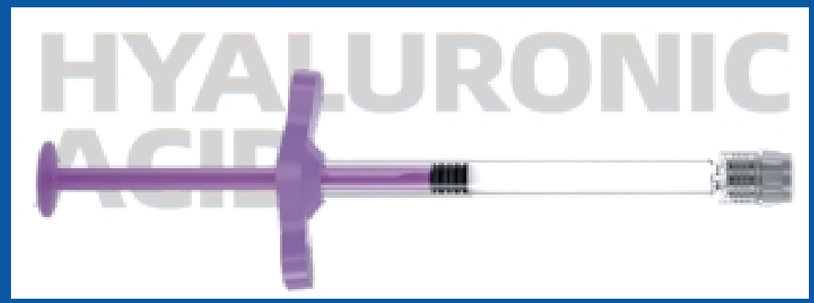

Key Benefits:
Targets a strong jawline by firming skin, lifting contours, and dissolving fat deposits simultaneously.

Main Ingredients:
•DMAD: Works by stimulating your skin's natural support cells (fibroblasts) to contract, resulting in a visible lifting effect.
•Organic Silicone (Mineral Complex): Acts as a micro-filler to smooth and tighten the skin by filling underlying gaps, while providing structural support.
•L-Carnitine: Boosts your body's natural ability to convert stored fat into energy.

Treatment Course: A course of 3 sessions, with each session 10-15 days apart. The first session softens, the second dissolves, and the third consolidates.

Deep Guide Non-Subsiding Fillers (All require aspiration)

Large, medium molecular
Net Content: 1 ml

2.1 Large Molecule

Core Component: Collagen, Hyaluronic Acid
Content/Additives: PLLA microspheres 18%-20% (stimulates the body's own collagen synthesis, providing both physical support and bio-activation), Cross-linked Hyaluronic Acid
Application Areas: Nose, Brow Bone, Chin
Advantages: Excellent support
Disadvantages: Can feel firm/hard, limited application areas, final form is achieved in one session

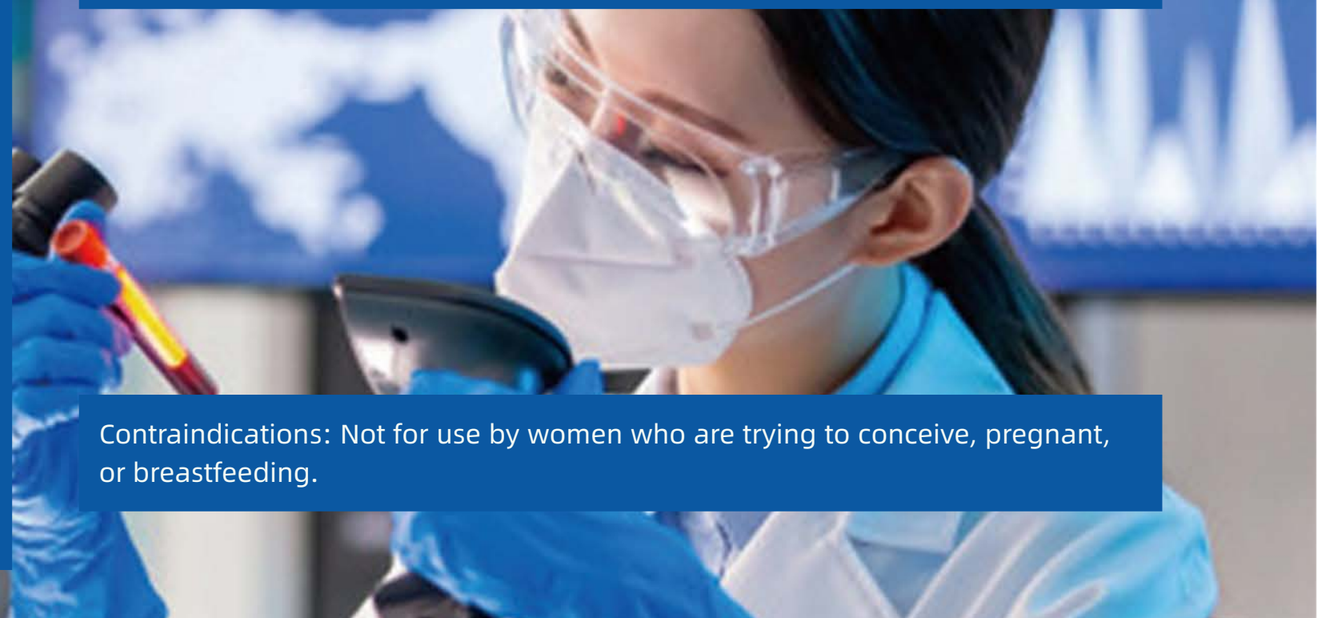

Effect Duration & Timeline:
Becomes more natural in 1-2 weeks, reaching its best state at 9-18 months.
Results typically last 1.5 to 2 years, though this varies based on individual metabolism and physique.
Treatment Phases:
Phase 1 (0-9 months): Provides immediate filling and sculpting with optimal support.
Phase 2 (After 9 months): The material gradually metabolizes, but its collagen-stimulating effect continues. Some slight settling in the treated area may occur.

Recommendation:
A touch-up injection around 9 months is recommended to prolong the optimal effect.

2.2 Medium Molecule

Core Component: Collagen, Hyaluronic Acid
Application Areas: Temple, chin, glabellar lines, nasolabial folds, lips
Advantages: natural beauty
Disadvantages: Support is relatively weaker, but final results are immediate.

Effect Duration & Timeline:
1-2years

Contraindications: Not for use by women who are trying to conceive, pregnant, or breastfeeding.

Deep Guide Non-Subsiding Fillers (All require aspiration)

PIG COLLAGEN
Net Content: 1 ml

Hitaluronic(Vital)
Net Content: 1 ml

2.3 Collagen (Small Molecule)

Classification: Pig Collagen Small Molecule
Core components: Micro-collagen, Hyaluronic Acid (contains slight cross-linker)
Content: Collagen 3.5% (Type I collagen 85%, Type III 15%)
Application Areas: Periorbital lines, neck lines, nasolabial folds
Advantages: Natural aesthetic appeal
Disadvantages: Support capability is comparatively weaker; final form is achieved in one session
Duration: 1-2 years

2.4 Hitaluronic (Vital))

Classification: Hitaluronic(Vital)
Core Components: Micro-collagen, Hyaluronic Acid
Content: Non-crosslinked sodium hyaluronate 70%, cross-linking agent 10%, multiple amino acids, vitamin B12, carnosine
Application Areas: Static wrinkles, tear troughs, glabellar lines, dark circle reduction, improves true wrinkles in the periorbital area
Advantages: Natural-looking results
Disadvantages: Support capability is relatively weaker; final results are immediate
Duration: Normally lasts about 6 months, with maintenance recommended every 3 months. It absorbs moisture within 1-2 weeks and continues to rejuvenate, with results lasting 6-12 months.

Contraindications: Not for use by women who are trying to conceive, pregnant, or breastfeeding.

Deep Guide Subsiding Fillers

1

FREEZE-DRIED POWDER
（FULL FALLBACK）
Net Content: 50mg+2.8ml

2

1FREEZE-DRIED POWDER
（FULL FALLBACK）
Net Content: 80mg+3ml

3

FREEZE-DRIED POWDER
（FULL FALLBACK）
Net Content: 100mg+4.5ml

4

PLLA (40% REBOUND)
Net Content: 100mg+4.5ml

5

PDRN COLLAGEN (20% REDUCTION)
Net Content: 100mg+4.5ml

Main Ingredients (Powder): Serum Albumin + Sodium Hyaluronate + Oligopeptide-1
Content Note: More Mannitol results in more powder volume, but Mannitol is not the core functional ingredient. Quantity does not determine efficacy.

Core Ingredient Analysis:
Serum Albumin (aka live cells, in the powder): Activates human cells to promote natural growth. Shows no foreign objects on scans, yielding natural-looking results.
Oligopeptide-1: Repairs cells.

Reason: The Serum Albumin growth cycle is one month. Over-treating during this period can easily lead to overgrowth.
Application Areas: Nasolabial folds, glabellar lines, temple hollows, crow's feet, body.
Key Efficacy Differentiator: Safer, but cannot achieve the final desired result in a single session.
Filling Method: Stimulates cells.

Liquid Types:
Pure Water (contains no Hyaluronic Acid)
Thin Water (contains trace amounts of Hyaluronic Acid)
Thick Water (contains 10% Hyaluronic Acid)

Main Ingredients (Powder): Serum Albumin
Solvent: Dextrose Solution

Content Note: The dextrose is contained within the solvent.

Core Ingredient Analysis:
The powder contains Serum Albumin.
The solvent is Dextrose Solution.

Application Areas: Nasolabial folds, glabellar lines, temple hollows, crow's feet.

Key Efficacy Differentiator:
Effective immediate results.
Low tendency for redness and swelling.
Final form is achieved in one session.

Filling Method: Support from large-molecule dextrose solution.
Liquid Type: Dextrose solution (contains no Hyaluronic Acid).

Main Ingredients (Powder): Type 1+3 Collagen, PDRN + PDRN Collagen Solution

Content Note: Extremely low allergy rate. For those concerned about allergies, perform a small skin test on the inner forearm. Observe for 10-15 minutes. If no redness occurs, it can be used; otherwise, discontinue use.

Core Ingredient Analysis: Based on Type 1+3 Collagen, enhanced with PDRN. It has 98% similarity to human tissue, minimizing rejection risks. It promotes cell regeneration and division, and improves damaged skin conditions.

Application Areas: Nasolabial folds, glabellar lines, temple hollows, crow's feet.

Key Efficacy Differentiator: Excellent immediate results, final form is achieved in one session.

Filling Method: Directly supplements collagen.

Liquid Type: Thin Water (contains trace amounts of Hyaluronic Acid).

B-Grade Skin Boosters

1

4.1 Hyaluronic Acid
Net Content: 4.5ml

Effects: Hydrating, Moisturizing
Ingredients: Sodium Hyaluronate, Mannitol

Injection Method: Using a device, the nutrient complex is evenly injected into the superficial dermis (depth approx. 0.5-1.5mm). The full face single session dosage is approx. 3-5ml, administered as multiple point injections (0.1-0.2ml per point).
Application Areas: Can be used on the face, neck, and hands.

Classification:
Large Molecule Hyaluronic Acid: Firmer consistency, suitable for nose and chin augmentation. Duration: 2-3 months, up to 6 months.

Medium Molecule Hyaluronic Acid: Softer consistency, suitable for tear trough, temples, and other filling needs. Duration: Approximately 6 months.

Small Molecule Hyaluronic Acid: Suitable for periorbital area filling. Duration: 4-6 months.

2

4.2 BRIGHTENING SPOT REDUCING SERUM
Net Content: 4.5ml

Effects & Benefits:
Brightens & evens skin tone, hydrates & moisturizes, reduces hyperpigmentation, fades dark spots, accelerates exfoliation of pigmented keratinocytes, provides antioxidant defense.

Key Ingredients:

Niacinamide: Inhibits melanin production, accelerates skin cell turnover, repairs photo-damage, and helps fade existing spots.

Glutathione / Ascorbic Acid (Vitamin C): Powerful antioxidants that brighten the complexion and improve radiance.

Sodium Hyaluronate: Provides intensive hydration.

Application:
Primarily designed for topical application on the face and neck. Can be used in injectable formulations in low concentrations (offers a safer, lower-risk alternative with reduced allergy potential).

3

4.3 Hydro VC Essence
Net Content: 5ml

Effects & Benefits:
Brightens skin, provides antioxidant protection, deeply hydrates and moisturizes, enhances skin elasticity, and improves overall skin texture and radiance.

Key Ingredients:

Ethyl Ascorbic Acid (a form of Vitamin C): Primarily responsible for skin brightening and antioxidant effects.

Sodium Hyaluronate: Enhances the product's hydrating and moisturizing properties.

Application:
Suitable for topical application on the face, neck, hands, and other areas.

4

4.4 Pink Booster + Celebrity Face
Net Content: 5ml+7ml

Effects & Benefits: Minimizes pores, hydrates and moisturizes, improves skin dullness.

Key Ingredients: Exosomes (cellular vesicles containing over 40 amino acids to nourish the skin), Sodium Hyaluronate.

Application: Suitable for topical application on the face, neck, hands, and other areas.

Injection Method: Using a device, the nutrient solution is evenly injected into the superficial dermis (depth approx. 0.5-1.5mm). The full face single session dosage is approx. 3-5ml, administered as multiple point injections (0.1-0.2ml per point).

Precautions:
Avoid contact with water for 24 hours.
Avoid makeup and direct sun exposure for 3 days.
Refrain from spicy foods, smoking, alcohol, and strenuous exercise for 1 week.

5

4.5 PDRN (Salmon DNA)
Net Content: 5ml

Main Ingredients: Sodium DNA, Sodium Hyaluronate

Effects:
Soothes inflammation and reduces redness
Repairs the skin barrier
Provides anti-aging benefits (ideal for post-procedure recovery)
Activates cellular regenerative ability
Hydrates and moisturizes the skin

Application Areas:
Face: Especially on dry areas, fine lines, dull spots, and enlarged pores
Neck, Shoulders, & Hands

Scalp: Helps improve blood circulation, nourish hair follicles, and promote hair growth
Legs & Chest Area

6

14.6 Type III Collagen Essence + Lyophilized Powder
Net Content: 7ml+10ml

Main Ingredients:
Type III Collagen (Promotes skin cell regeneration)
Soluble Collagen (Contains amino acids that boost collagen synthesis)
Oligopeptides (Accelerate collagen regeneration and repair damaged cells)
Recombinant Human Collagen (Type III)

Effects & Benefits:
Replenishes collagen
Anti-aging
Lifts, firms, and tightens the skin
Repairs skin damage
Suitable for sensitive skin and post-procedure recovery
Creates a fuller, more sculpted facial contour
Can be used to fill tear troughs
98% Purity

Application Areas:
Face/Neck/Hands/Legs/Abdomen (helps improve the appearance of stretch marks)/ Neck & Shoulders (helps reduce fine lines and sagging)

C-Grade Superficial Guide Boosters

	1	2	3	4	5	6	7

Main Water, Glycerin, Sodium Hyaluronate, Acetyl Tetrapeptide-5 (Pentapeptide), Acetyl Hexapeptide-8 (Hexapeptide), Nonapeptide-1, Arginine, Lysine	Water, Glycerin, Type III Collagen, Sodium Hyaluronate	Water, Sodium Hyaluronate, Glycine, Glutathione	PDRN, Sodium DNA, Sodium Hyaluronate	Tranexamic Acid	Tranexamic Acid, Glabridin, Niacinamide, Tranexamic Acid, Glutathione	Same core formula as our Nutrient Booster, with the addition of Malachite Extract.	
Efficacy	Firming and lifting, reducing wrinkles	Supplement collagen, rejuvenate skin and resist aging	Supplement collagen, shrink pores, and brighten skin tone	Repair and regeneration, brightening and skin rejuvenation, repairing damage, firming and lifting	Whitening and spot-fading, anti-inflammatory and repairing	Brighten skin tone, moisturize and firm the skin, fade pigmentation, and replenish and moisturize the skin	Shrink pores and brighten skin tone

Superficial Guide Lyophilized Powders

1	2	3	4	5	6	7
						
6.1 Acne Removal Lyophilized Powder Net Content:4.5ml + 100mg	6.2 Whitening Master Net Content: 100mg+100mg+4.5ml	6.3 Glutathione Net Content:4.5ml+100mg	6.4 Firming ABCD Net Content:50mg+2.8ml + 4.5ml	6.5 Lifting ABCD Net Content:50mg+2.8ml + 4.5ml + 10ml	6.6 Oligopeptide Lyophilized Powder Net Content:2.8ml+50mg	6.7 Repairing Solution Net Content:15ml/10ml

Main Ingredients

•Salicylic Acid •Dipotassium Glycyrrhizate •Caprylhydroxamic Acid • Sesame Amino Acids	•Glutathione •Glutathione & Vitamin C (Ascorbic Acid) •CMannitol, Niacinamide, Nonapeptide, Oligopeptide-1	•Glutathione	•Hydrogenated Castor Oil, Tranexamic Acid •Glutathione, Nonapeptide, Oligopeptide, Serum Protein • Apple Fruit Extract	•Pentapeptide, Hexapeptide •Oligopeptide-1 •Collagen, Polypeptide, Arginine, Lysine • Cell-Penetrating Peptide (CPP)	•Oligopeptide-1 •Hyaluronic Acid • Mannitol •Glutathione	•Oligopeptide-1 •Hyaluronic Acid • Mannitol

Efficacy

•Acne Treatment & Brightening •Anti-Acne and Dark Spot Corrector •Fight Acne and Fade Marks	•Oil-Control & Hydrating Acne Treatment •Brightening and Restoring Serum	•Antioxidant & Brightening Serum •Detoxifying & Dark Spot Correcting Treatment •Antioxidant, Detoxifying, and Brightening	•Brightening & Dark Spot Corrector •Multi-Action Pigment Inhibitor •Targeted Hyperpigmentation Treatment	•Firming & Wrinkle Reduction Cream •Lifting and Line Smoothing Serum •Anti-Aging Firming Treatment	•Post-Procedure Recovery Cream •Calming Serum for Acne-Prone Skin •Post-Surgical Care & Acne Soothing Solution	•Post-Procedure Recovery Serum: Intense Hydration & Brightening •Post-Procedure Care Cream with Deep Hydration and Brightening Effects

Site of action

•Apply evenly to face	•Apply evenly to face, neck, and hands.

Gels and Facial Masks

7.1 Medical Feminine Intimate Gel (Medical Device)

Net Weight: 3g x 3 tubes

Key Features:
•For use prior to intimacy to instantly tighten, enhance fullness, and boost sensitivity.
•Provides immediate firming and deep moisturization, intensifying intimate sensitivity.

Key Ingredients
Ectoin / Polypeptides / Hyaluronic Acid.

Benefits
•Immediate Tightening & Firming
•Plump & Intense Hydration

Precautions
•Do not use during menstruation.
•Contraindicated for pregnant women.
•Do not apply on broken skin or mucous membranes.
•Use with caution if you have sensitive skin or are prone to allergies.

7.2 Feminine Intimate Hygiene Gel (Sanitizing)

Net Weight: 3g x 3 tubes

Key Features:
•Crafted with a traditional herbal blend, this product is both gentle and safe. It effectively addresses intimate odor and itching while helping to maintain a healthy microbial flora for long-term wellness.

Key Ingredients
Silver Ions/Ginkgo Biloba Leaf Extract/Oligopeptide-2

Benefits
•Soothes irritation and maintains a healthy microbial balance.
•Provides antibacterial protection while balancing the skin's microbiome.

Precautions
•Do not use during menstruation.
•Contraindicated for pregnant women.
•Do not apply on broken skin or mucous membranes.
•Use with caution if you have sensitive skin or are prone to allergies.

Gels and Facial Masks

7.3 Crystal Ice Mask

Net Weight: 80g

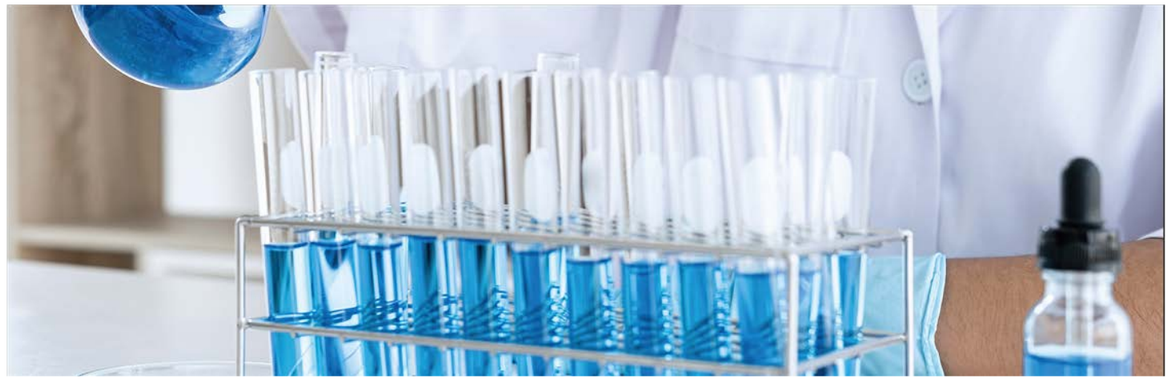

Key Features:
•For Enhanced Soothing: Chill before use to intensify the calming and soothing effect on skin.
•Eco-Conscious & Dissolvable: Mask material dissolves completely in 70°C water, making it environmentally friendly.
•Visible Essence Absorption: After 30 minutes of application, the thinning of the mask indicates active infusion of nutrients.

Key Ingredients:
Water / Glycerin / Propylene Glycol/ Sodium Alginate / Glycyrrhiza Glabra (Licorice) Root Extract

Benefits:
Soothes, Repairs, and Relieves: Ideal for post-procedure recovery and dry, itchy skin.

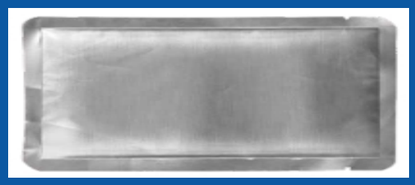

7.4 Age-Defying Peptide Mask

Net Weight: 25g

Key Features:
•Use after treatments to deliver intense, soothing hydration. A single application is all it takes to reveal a visibly brighter, more radiant complexion.
•This mask is a perfect post-procedure companion, deeply replenishing moisture while brightening the skin's appearance by 1-2 shades for a revived glow.

Key Ingredients
Water / Oligopeptide-1 & Oligopeptide-1 / Sodium Hyaluronate / Sophora Flavescens Root Extract / Dendrobium Nobile Extract

Benefits
Soothes, Repairs, and Relieves: Ideal for post-procedure recovery and dry, itchy skin.
